Funiki SPLASH Control Voltage Visualizer

Overview

Funiki SPLASH is a Eurorack module that lets you visualize any control voltage (CV) using external LED strips as a voltage level meter. Up to three strips are directly driven by the module and the LED display patterns can be manually selected, externally triggered, or chosen at random.

Features

- Monitors control voltages (-5/+5v or -10/+10v) and displays their value on external LED strips, similar to a large level meter
- Manual or automatic LED display pattern control for attractive and stimulating displays
- Drives up to three separate LED strips, up to 10 meters (32 ft) long each
- Built-in display patterns and color combination controls
- Analog level input and Trigger input for display control
- Single HP16 Eurorack module

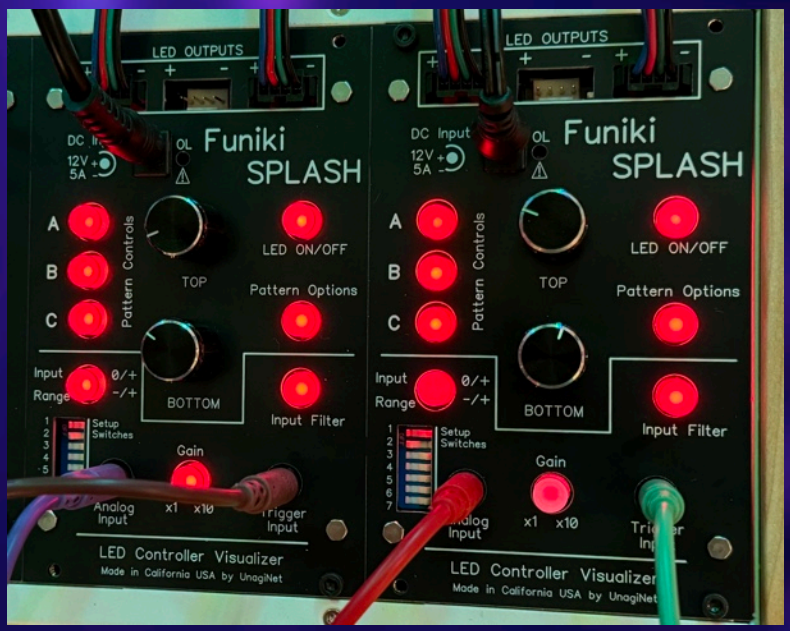
Funiki SPLASH Control Voltage Visualizer

Now you can actually see the control voltages of your Eurorack setup, by using Funiki SPLASH. This Eurorack module lets you see your modular setup working, by giving visual patterns and colors to any monitored voltage. Drives up to three strips of LEDs that act like a huge level meter for the analog input. The strips have 256 LEDs each and can be any length up to several meters long. 2 meter and 5 meter lengths are currently available.

Funiki SPLASH comes with built-in patterns so you can setup a striking visual display for your Eurorack system. The built-in pattern bank can be customized by programming the user accessible EEPROM, so your displays can be tailored to your specific needs.

Technical Specifications

- Single HR16 Eurorack module
- One analog input, selectable -5/+5v or -10/+10v range
- One trigger input, 0 to +5 volt range
- Selectable input gain, x1 or x10
- Low pass filter to eliminate input noise
- Drives up to three display strips with 256 LEDs each
- Module uses -12 and +12vdc internal Eurorack supply
- External LED power supply must be used to drive LEDs (+12vdc, 5amp min)
- Manual LED power on/off switch
- Overload protection built-in



Ordering Information

Model A2L30A - Analog LED Controller Visualizer
Model L256M5 - LED strip, 5 meter long
Model L256M2 - LED strip, 2 meter long
